## HTML Structure

### 1. Modal Window Contact me

I created a modal window to display contact information such as phone number and the contact time.

### 2. Header

# MyWALL Documentation

The "Header" is made up of a large image in the background. I have attached several images that can be used for the background of the "Header".

To change the background image go to the "img" folder and delete the image "bg\_head.png" or "bg\_head\_X.png" and replace it with another with the same name. You can also modify CSS directly :

```
header {  
  margin: 0px;  
  top: 0;  
  bottom: 0;  
  right: 0;  
  left: 0;  
  background: url('../img/bg_head.png') no-repeat center center;  
  -webkit-background-size: cover;  
  -moz-background-size: cover;  
  -o-background-size: cover;  
  background-size: cover;  
  width: 100%;  
  min-height: 100vh;  
  text-align: center;  
  padding-top: 51px;  
  padding-bottom: 40px;  
}
```

## 3. Menu Navigation

The navigation is composed of two parts: the main menu (Left Menu) and the quick contact menu (Right Menu).

## 4. Menu Left

This is the main menu:

```
<!-- Navigation Sections -->  
<ul class="dropdown-menu">  
  <li><a data-scroll data-options='{ "easing": "easeOutQuint" }' href="#top"  
class="menu-item wall">Hello</a></li>  
  <li><a data-scroll data-options='{ "easing": "easeOutQuint" }' href="#about"  
class="menu-item wall">About Me</a></li>  
  <li><a data-scroll data-options='{ "easing": "easeOutQuint" }' href="#skills"  
class="menu-item wall">Skills and Abilities</a></li>  
  <li><a data-scroll data-options='{ "easing": "easeOutQuint" }'  
href="#education" class="menu-item wall">Education</a></li>  
  <li><a data-scroll data-options='{ "easing": "easeOutQuint" }' href="#work"  
class="menu-item wall">Work Experience</a></li>  
  <li><a data-scroll data-options='{ "easing": "easeOutQuint" }' href="#portfolio"  
class="menu-item wall">Portfolio</a></li>  
  <li><a data-scroll data-options='{ "easing": "easeOutQuint" }'  
href="#download" class="menu-item wall">Social Networks</a></li>  
  <li><a data-scroll data-options='{ "easing": "easeOutQuint" }' href="#contacto"  
class="menu-item wall">Contact Me</a></li>  
</ul>
```

## MyWALL Documentation

To create a new link in the menu you only need to add the code in red inside `<ul class="dropdown-menu"></ul>`.

```
<!-- Navigation Sections -->
<ul class="dropdown-menu">
  <li><a data-scroll data-options='{ "easing": "easeOutQuint" }' href="#top"
  class="menu-item wall">Hello</a></li>
  <li><a data-scroll data-options='{ "easing": "easeOutQuint" }' href="#about"
  class="menu-item wall">About Me</a></li>
  <li><a data-scroll data-options='{ "easing": "easeOutQuint" }' href="#skills"
  class="menu-item wall">Skills and Abilities</a></li>
  <li><a data-scroll data-options='{ "easing": "easeOutQuint" }'
  href="#education" class="menu-item wall">Education</a></li>
  <li><a data-scroll data-options='{ "easing": "easeOutQuint" }' href="#work"
  class="menu-item wall">Work Experience</a></li>
  <li><a data-scroll data-options='{ "easing": "easeOutQuint" }' href="#portfolio"
  class="menu-item wall">Portfolio</a></li>
  <li><a data-scroll data-options='{ "easing": "easeOutQuint" }'
  href="#download" class="menu-item wall">Social Networks</a></li>
  <li><a data-scroll data-options='{ "easing": "easeOutQuint" }' href="#contacto"
  class="menu-item wall">Contact Me</a></li>
</ul>
```

### 5. Menu Right

This is the quick contact menu. We have already mentioned above the modal window. We also have the "Hire me" button that makes scroll to "Contact me"

### 6. Personal Details

In the "header" we have a photo and personal data. I recommend using a photo with circular cut but you also have the possibility to use a photo with square cut as there are no limitations of the template.

To change the image , just change the content of the code in red below. To change the content of the text, change what is highlighted in pink.

```
<!-- Personal Details -->
<div class="container">
  
  <h1 class="name-boss">Andrey Marin</h1>
  <h2 class="main-details">Designer. Programmer. Creative. Innovator.</h2>
  <p class="extend-details">Lorem ipsum dolor sit amet, consectetur
  adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.
  Ut enim ad minim veniam, quis nostrud exercitation ullamco.</p>
</div>
<!-- // Personal Details -->
```

### 7. About Me

This section is composed of many more subsections, to make it more simple.

# MyWALL Documentation

## 8. Intro (Text Type)

This part is the main greeting with a written text effect. This consists of a static text "Hi. I'm " and a number of dynamic texts . To change it, you only have to change the text that is highlighted in pink.

```
<!-- About Me Intro - Text Type - Hi. I'm ... -->
  <section id="about" class="cd-intro">
    <h1 class="cd-headline letters type">
      <!-- Static Text -->
      <span>Hi. I'm </span>
      <!-- Automatic Text Type -->
      <span class="cd-words-wrapper waiting">
        <b class="is-visible">the next Steve Jobs</b>
        <b>incredible and amazing</b>
        <b>better than the Flash</b>
      </span>
    </h1>
  </section>
<!-- // About Me Intro -->
```

## 9. About Me Context

This section includes a brief summary of text and an image. Same as the previous cases, it changes the contents of the text and the address of the image. Before you change the direction of the image include it in the "img" folder.

Below, there is a set of three columns dedicated especially to indicate your best personal skills or stand out as you are. For example: "coffee lover".

To change the image, you have to replace the content of " src " highlighted in red. Images have to be 64x64. And if you want to change the content replaces that is highlighted in pink.

```
<!-- Col 1 -->
<div class="col-sm-4">
  <div class="col-md-4 img-myextra">
    
  </div>
  <div class="col-md-8">
    <h5 class="text-five">Good camera</h5>
    <p class="text-subfive">Ensectetur adipiscing elit, sed do eiusmod
    tempor incididunt ut labore et dolore magna aliqua.</p>
  </div>
</div>
```

## 10.About Me Gallery

Here, we have included a small gallery staff to put a couple of photos. To customize the content of the gallery just change the direction "src " of the images. Remember to change the "alt " tag for the SEO .

# MyWALL Documentation

```
<!-- Owl Carousel images -->
<div class="owl-carousel">
  <div class="item"></div>
  <div class="item"></div>
  <div class="item"></div>
  <div class="item"></div>
  <div class="item"></div>
  <div class="item"></div>
</div>
<!-- // Owl Carousel images -->
```

Then we have 3 columns to express our best skills with images of 128x128.

## 11.Skills and abilities

First we have an introductory text to "Skills and Abilities ".

Then we have our abilities separated by structures with percentages. To change the skill only changes the text and the icon that has to be 32x32 maximum.

There is also a list of percentages that you can use by changing the html classes.

## MyWALL Documentation

```
/* ---- COLORS SKILLS ----*/
.my-red {
  background-color: #F53440;
}
.my-blue {
  background-color: rgb(9, 137, 231);
}
.my-pink {
  background-color: rgb(236, 8, 86);
}
.my-aqua {
  background-color: #00ADC8;
}
.my-purple {
  background-color: rgb(88, 1, 131);
}
.my-green {
  background-color: #00CD98;
}

/* ---- PERCENT SKILLS ----*/
.my-ten {
  width: 10%;
}
.my-twenty {
  width: 20%;
}
.my-thirty {
  width: 30%;
}
.my-fourty {
  width: 40%;
}
.my-fifty {
  width: 50%;
}
.my-sixty {
  width: 60%;
}
.my-seventy {
  width: 70%;
}
.my-eighty {
  width: 80%;
}
.my-ninety {
  width: 90%;
}
.my-hundred {
  width: 100%;
}
```

And its implementation is the next one, you have to change it according to the css styles above are underlined in pink (color) and Red (percentage):

## MyWALL Documentation

```
<!-- Skills percent 1 -->
<div class="col-md-6 separ">
<div class="hidden-xs col-sm-1 icon-skill">

</div>
<div class="col-sm-11 col-md-11">
    <div class="col-sm-12 col-md-12 title-skill">HTML5</div>
    <div class="col-sm-12 col-md-12 bar-skill">
        <div class="this-skill my-pink my-ninety"></div>
    </div>
</div>
</div>
```

Below we have a subcategory which we have called "Abilities". It consists of 3 columns which you can modify to your liking. It's very simple, you just have to change images and text.

### 12.Education

The "education" section is composed of an introduction and the timeline.

The timeline is easily modifiable, you will apply the same color filters that we have applied before. The images have to be 64x64. And the rest is just change the text in the html document.

### 13.Work Experience

The "Work Experience" section is very simple, uses the "tabs" bootstrap and the same effects.

First we find the navigation. The link "href" refers to the "id" of the "Tab pane".

```
<!-- Nav tabs -->
<ul class="nav nav-tabs" role="tablist">
<li role="presentation" class="active"><a href="#1" role="tab" data-
toggle="tab">Google</a></li>
    <li role="presentation"><a href="#2" role="tab" data-
toggle="tab">Envato</a></li>
    <li role="presentation"><a href="#3" role="tab" data-
toggle="tab">Dribbble</a></li>
    <li role="presentation"><a href="#4" role="tab" data-
toggle="tab">Github</a></li>
    <li role="presentation"><a href="#5" role="tab" data-
toggle="tab">Freelancer</a></li>
</ul>
```

The rest is only to change the contents of the document.

### 14.Portfolio

## MyWALL Documentation

I've made a very simple portfolio, easy to use and adaptable. All you have to do is change the images for your projects.

```
<!-- Gallery -->
<ul class="container wall-portfolio">
  <li class="col-md-4 doblock"><a href="img/item-1.png" data-
  imagelightbox="b"></a></li>
  <li class="col-md-4 doblock"><a href="img/item-2.png" data-
  imagelightbox="b"></a></li>
  <li class="col-md-4 doblock"><a href="img/item-3.png" data-
  imagelightbox="b"></a></li>
  <li class="col-md-4 doblock"><a href="img/item-4.png" data-
  imagelightbox="b"></a></li>
  <li class="col-md-4 doblock"><a href="img/item-5.png" data-
  imagelightbox="b"></a></li>
  <li class="col-md-4 doblock"><a href="img/item-6.png" data-
  imagelightbox="b"></a></li>
</ul>
<!-- // Gallery -->
```

## 15.Social Networks and Download

You can put your links to your social networks and also put a link to download your resume in pdf, if you have one.

The rules are the same as before, change "href" for the links and "src" for the images.

## 16.Contact me

Your mail form will not work unless you have your files running on a hosting server with PHP / JS. When you have your files ready on your hosting server, you need to edit the settings to make the email function work.

### Step 1

Open js/sendemail.js and replace yourdomain.com with your real domain name in form post url (<http://izee.ro/envato/mywall/one/send-email.php>).

### Step 2

Open send-email.php and replace yourdomain.com with your real domain name in logo image url in the email body template (<http://www.izee.ro/img/izee.png>) You also need to change your from email address (Receiver Email Address) at the top with [andrey@izee.ro](mailto:andrey@izee.ro) to your real email address, same way you can change subject line with replace of text Contact us form details. Please feel free to contact us in case if your

# MyWALL Documentation

email feature does not work because some server settings do not allow normal PHP email function.

## 17.Footer

In the "footer" like in other parts you have to change only the content.

## Fonts

The main typeface is "Roboto" and is associated with Google Fonts, it's free.

## CSS

There are made 4 designs. Mywall One is the main. I have done the compression of the css for greater agility but also include the normal version without optimize.

The other variations of MyWALL depend on the main "mywall.css" and then I have created different variations "black.css", "white.css" and "light.css". In the future I have planned to update more versions.

## JavaScript

We have available in the theme several javascripts.

1. bootstrap.min.js it is very important, comes from Bootstrap
2. imagelightbox.min.js, it helps us with the portfolio
3. main.min.js, that one of the main, it's for "type text" of about me
4. owl.carousel.min.js, it's for carousel of "about me"
5. sendemail.js, it helps us to send the email.
6. smooth-scroll.min.js, does the scrolling of the page
7. waypoints.min.js, it is important for the menu to scroll
8. More About MyWALL and Licence

## PHP File

- sent-email.php, This file is used for contact us section of mail sent process.
